### Scope of review

We conducted our review in accordance with Cambodian International Standard on Review Engagements 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Cambodian International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. #### 2. BASIS OF PREPARATION

## 2.1 Statement of compliance

The condensed interim financial information has been prepared in accordance with Cambodian International Accounting Standard 34 Interim Financial Reporting.

The condensed interim financial information does not include all the notes of the type normally included in annual financial statements. Accordingly, this condensed interim financial information should be read in conjunction with the annual financial statements for the year ended 31 December 2021 and any public announcements made by the Bank during the interim reporting period.

## 2.2 Critical accounting judgments and key sources of estimation uncertainty

The preparation of the condensed interim financial information requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, and income and expenses. Actual results may differ from these estimates.

In preparing the condensed interim financial information, significant judgements made by management in applying the Bank's accounting policies and the key sources of estimation uncertainty were the same as those that were applied to the annual financial statements for the year ended 31 December 2021.

### 16. SEGMENT REPORTING

The Bank's majority of income is from the same business segment, which is credit and lending, and all activities are carried out in the Kingdom of Cambodia.

### 17. FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES

Fair value represents the amount at which an asset could be exchanged or a liability settled on an arm's length basis. Market prices are not available for a significant proportion of the Company's financial assets and liabilities. Fair values, therefore, have been based on management assumptions according to the profile of the asset and liability base. Management believes that the carrying amounts of the financial assets and liabilities included in the statement of financial position are a reasonable estimation of their fair values. In making this assessment, management assumes that loans to customers are mainly held to maturity with fair values equal to the book value of loans to customers adjusted for provision for loan losses, if any.

### 18. FINANCIAL RISK MANAGEMENT

The Bank's financial risk management policies are consistent with those disclosed in the annual financial statements for the year ended 31 December 2021.

### Liquidity risk

### Maturity analysis for financial assets and financial liabilities

The following tables set out the remaining contractual maturities of the Bank's financial assets and financial liabilities. The sum of the balances depicted in the maturity analysis do not reconcile with the carrying amount of the assets/liabilities as disclosed in the statement of financial position, this is because maturity analysis incorporates, on an undiscounted basis, all cash flow relating to principal. The amount for issued loan commitments and financial guarantees contract is the maximum amount that may be drawn down under the loan commitment, or called under the financial guarantees contract, both included in the earliest possible period under these could be paid. The undiscounted cash flows potentially payable under financial guarantees and similar contracts are classified on the basis of the earliest date they can be called.

## NOTES TO THE INTERIM FINANCIAL INFORMATION FOR THE THREE-MONTH AND SIX-MONTH PERIODS ENDED 30 JUNE 2022

### 19. IMPACT OF COVID-19

The impact of the Coronavirus ("COVID-19") pandemic has spread across various geographies globally. The World Health Organisation declared an international health emergency due to the outbreak of COVID-19 in January 2020 and has characterised the spread of COVID-19 as a global pandemic since March 2020. The continuing spread of COVID-19 has caught the world off-guard, with significant implications for personal health and business continuity.

To support the economy and the financial sector, the NBC and the Royal Government of Cambodia have taken numerous steps primarily to help businesses during this unprecedented time such as loan restructuring directive and establishment of SME Bank to facilitate the SME Co-Financing Scheme (SCFS).

Management will continue to monitor the potential impact of COVID-19 and will take all steps to mitigate any effects on the Bank's operations.

The Bank has performed assessments of COVID-19 impacts in the light of the available guidance of the NBC and CIFRSs which is consistent with the calculation as of 31 December 2021, which have resulted in the following:

## i) Expected credit losses

### Probability of Default ("PD")

PD is calculated using monthly migration matrices over past seven years data consisting of 72 matrices. More granular approach is adopted by breaking Stage-1 in to "Bucket 0" which 0 days past due and "Bucket-1" with 1-29 days past due loans.

### Loss Given Default ("LGD")

Active accounts for which the recovery is still ongoing have been included in LGD calculation based on the LGD period workout analysis. Exposure for LGD calculation has been taken as on the default period as revised from Exposure at Default ("EAD") which used to increase over the period adopted in the previous model. Industry level LGD is calculated which aligns to the segmentation used for PD calculation.

### Probability weighted outcome

Currently, base, upside and downside scenarios have been given weightages as 60%, 20% and 20% respectively.

### **Forward-looking information**

Forward-looking information is used only for PD. For LGD, the forward-looking information is not considered as the default counts in the earlier quarters are not sufficient to undertake reliable forward-looking statistical analysis.

### **19. IMPACT OF COVID-19** (continued)

## i) Expected credit losses (continued)

### Main macroeconomic factors

The following macroeconomic factors are identified and used for forward looking PD.

| PD segment                   | Macroeconomic Factor <sup>(1)</sup>                      |
|------------------------------|--|
| Agriculture                  | Cambodia CPI - (cpi_2010_100)                            |
| Construction and Real Estate | GDP at Current Price, Industry (YOY,%) – (gdp_industry)  |
| Real Estate Rentals          | Cambodia GDP at Constant 2000 Price – (gdp_constant2000) |
| Manufacturing                | FDI Net Inflow - (fdi)                                   |
| Wholesale and Retail         | Cambodia CPI - (cpi_2010_100)                            |
| Services                     | GDP at Current Price, Industry (YOY,%) – (gdp_industry)  |
| Personal Loan                | GDP at Current Price, Industry (YOY,%) – (gdp_industry)  |

<sup>(1)</sup> All macroeconomic factors are based in the Cambodia context unless otherwise indicated.

The Bank has also incorporated ECL overlay of US\$30 million as at 30 June 2022 (2021: US\$25.6 million). This represents additional ECL under stressed scenario if certain portion of restructured portfolio defaulted based on the migration rate of the restructured portfolio which has passed the exemption period, due to economic uncertainties under COVID-19 environment, increase in global inflation and negative spillovers from the war in Ukraine.

## ii) Accounting for modified financial assets

Considering the economic factors, the Bank has delayed loan repayments for borrowers involved in all sectors whose businesses are affected by the COVID-19 outbreak up to 12 months. The modification gain and loss on those financial assets was not considered to be material.

### iii) Valuations estimates and judgements

The Bank has considered potential impacts of the current economic volatility in determination of the reported amounts of the Bank's financial and non-financial assets and these are considered to represent management's best assessment based on observable information. Markets, however, remain volatile and the recorded amounts remain sensitive to market fluctuations.
